

## Our Secondary School – Enrolling now in Years 9 & 10

We are a Special Assistance School. Capstone College is different from a “regular school” in that we exist to serve the needs of clients who have, for various reasons, not managed in regular

schools. Some of these reasons include; issues of health or disability; homelessness; mental health; bullying in previous schools; behaviour difficulties; social and financial disadvantage; issues with school refusal; carer for family; English as a second language and learning difficulties.

**As a college we do not judge a person by their past but offer a chance for different and better future.**

Most young people can cope with the rigours and systems of regular schools, but some young people find school to be just too hard – these are the ones we are here to help.

## Year 9/10 program

- Our learning areas are well resourced with staffing, facilities, computers, internet access and all the required materials for students to do their work. The year nine and ten students have what is called an “immersive program”. Real life learning experiences include the arts and performance, silver smithing and hot glass, science done in nature, 3D printing and lots of practical projects!

How do we meet our students' complex needs? Working with young people who find school difficult for a lot of reasons means that we need to provide a supportive culture that encourages learning in new ways. Being particularly aware of individuals and meeting them where they are at is a good start. Our staff and students build this culture of acceptance and support. We have a youth worker and other support staff in class to provide extra help. Our class numbers are kept purposely small so that we can care for individual needs more effectively.

We service the areas covered by Launceston, Deloraine, and Campbell Town. We have a free bus service which picks up and drops off students to their homes or at a convenient location. Capstone College is an inclusive open enrolment private school. We do not charge fees but cover most of a student's education costs. Contact us to find out more!
